

Github: <https://github.com/RRteddy/project-10-daniel-t.git>

Webpage: <https://mscacresearch.netlify.app/>

Throughout the term, I have contributed multiple things to this project:

- **Frontend Development**
- **Webpage Design / Development**
- **Team Report**
- **Communicate with Partner**
- **README.ME**

Our team is divided into three teams: Frontend, Backend, and Testing. I am in Frontend Team designing and developing our project webpage. Moreover, I am also responsible for contacting our partner Daniel and completing the team reports for Planning, Assignment 1, and Assignment 2 since I have a clear understanding of the completion at each stage and know our partner's requirements. I need to book a meeting with our partner to communicate about what we have done at every stage and ask for feedback and improvements. In addition, I have also completed the README.ME of our project, which can be seen in the GitHub link.
